## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: reference number "6" is not in the spec. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Information Disclosure Statement***

2. The information disclosure statement (IDS) submitted on 11/4/03 has been considered by the examiner.

***Claim Objections***

3. Claims 5-7 are objected to because of the following informalities: Claims 5 and 6 reference the bearing counterpart, which was introduced in claim 4. The examiner has assumed claims 5 and 6 to depend on claim 4 rather than claim 1. Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 2, and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Hewko et al. (US 5,087,229 A).

Hewko et al. discloses a motorized wheel structure 10 comprising an electric rotating machine 80, 82, 132, a wheel 60 with hub 100 including cylindrical shaft, bearing or bearing counterpart section 40 including flange and cylindrical shaft for supporting the wheel hub, suspension 24, 32, bearing support member 16 defining a hole for the motor, a power output shaft 108, motor housing 44 with flange 48 for connection between the wheel-side of the bearing support member and the hub, as shown in figures 1-3.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 3, 6, and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hewko et al. as applied to claim 1 above.

Hewko et al. does not disclose the bearing and the motor as being integral. Simply making structure integral is not patentable unless it produces an unexpected result. It would have been obvious to one having ordinary skill in the art at the time of the invention to have made the motor flange 48 and bearing 40 integral in order to decrease the number of parts which in turn increases the strength of the connection.

***Allowable Subject Matter***

8. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
